INDUSTRY PROJECTS

PRODUCT LABELS

NORMAN BÄCHTOLD
HEAD OF STRATEGY & DIGITALISATION
KLING GMBH

At KLING, we are experts in promotional product presentations. We offer our clients bespoke solutions grounded in decades of experience. Our primary goal is to drive and enhance sales success at the point of sale.

With our extensive range of presentation displays, packaging, showcases, shop-in-shop solutions, cases, decorations, and brand stands, we provide everything you need from a single source. Our significant manufacturing depth at our Germany-based facility allows us to respond flexibly and promptly to your needs.

Our Philosophy

The value of our solutions is created through collaboration with our clients, whose wishes and ideas directly influence the design and development of our products.

We are committed to producing high-quality, durable products under environmentally friendly conditions that meet your expectations while conserving resources.

Looking to the Future

We remain closely attuned to the market, identifying trends and recognising opportunities to meet the expectations placed upon us. A foundation of partnership and a perspective of sustainability guide our path to success.

OUR STRATEGY FOR GREATER SUCCESS AND

MORE SUSTAINABILITY

EXPERIENCE A FAST-PACED TRACKING SHOT

Experience Kling's Working Areas with a Drone Flight

With this unique one-shot video, we take you into the world of manufacturing high-quality presentation products. Gain insight into our premises and discover the impressive variety of people, machines, and materials.

As an experienced manufacturer of product presentations in Germany, we bring your ideas and wishes to life at our production facility in Birkenfeld near Pforzheim, from the initial design to the delivery of the finished products. Made in Germany.

Can't be Done - Doesn't Exist! Or: Where There's a Will, There's a Way! It's not just our decades of experience, but also our passion for creating solutions and innovative approaches. This is what we live for and what our customers appreciate.

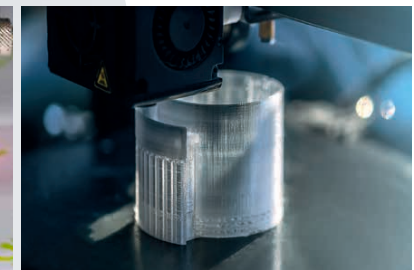

MARKUS BÄCHTOLD
CEO KLING GMBH

Product design and technical drawings on CAD form the basis for new products.

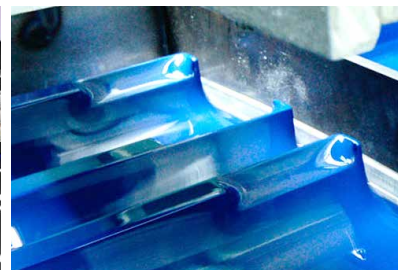

Laser and water jet cutting make us fast and flexible in processing.

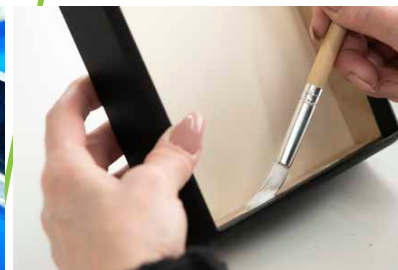

Initial samples are essential and showcase new products in three dimensions through 3D printing.

Exciting surfaces are customised with high-quality digital printing according to client requirements.

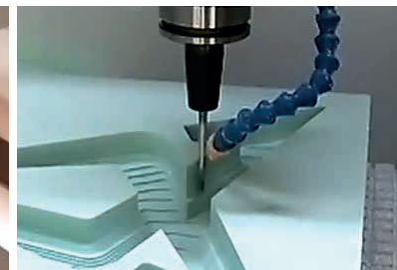

Thermoforming and injection moulding are perfect for the series production of plastic-based products.

High-quality covering materials with luxurious surfaces require skilled craftsmanship and experience in processing.

Industrial coatings provide visual and tactile perfection for high-quality products.

CNC milling is ideal for the production of tools as well as the machining of workpieces.

CLIENT PROJECT SCABAL
**PRESENTATION CASE
FOR HAUTE COUTURE**

This is how product presentation works at the point of sale. The Belgian men's outfitter for customised suits and high-quality business clothing commissioned a specially designed presentation case. Inside the case, there are presentation trays with magnetic fasteners for cufflinks, buttons and accessories. High-quality boxes with gold embossing of the brand logo and a specially produced folder for the exclusive textile samples complete the presentation programme in the high-class range.

CLIENT PROJECT HYT
**COMPLETE PROGRAMME
FOR HIGH-CLASS WATCHES**

The Swiss company HYT WATCHES has been relying on our quality products for years. The corporate design, featuring bevelled corners in chocolate brown, has an exceptionally high-quality and striking appearance. The presentation programme includes a window display with separate padded watch clips, a presentation tablet, a wooden box with high-quality surface finishing and front opening, as well as various presentation trays and gift boxes – all branded with a striking, high-quality embossed logo.

ALL-IN-ONE SOLUTIONS

CLIENT PROJECT BINDER
**COUNTER DISPLAY CASE
FOR CHAIN PRESENTATION**

A top-class showcase featuring two oval curved glass panes and a rotatable base made of fine wood in a diamond shape is a striking eye-catcher in any showroom. A partial photo print further attracts the viewer's attention. The display is designed to showcase the chain range on both sides, allowing customers to view them easily. This elegant form of attractive product presentation includes theft protection.

INTEGRATED PRESENTATION

PRESENTATION IDEAS AND COMPLETE SOLUTIONS FOR HIGH-QUALITY BRANDS

With our modular displays, elegant packaging and boxes, illuminated showcases, refined shop-in-shop solutions, durable presentation cases, eye-catching brand displays, and decorations, clients can present their collections professionally and convincingly. We offer precisely tailored solutions for high-quality

brands. Perfect staging of premium products, client-oriented solutions, and the creation of experiential worlds are essential components of successful product presentation at the point of sale. With locations and production facilities in Germany, other European countries, and Asia,

we can meet even the most demanding client requirements promptly and competitively. KLING offers complete solutions from a single source – from consulting, design, and initial samples to production, quality control, and shipping – and has been doing so for over 90 years.

This successful concept at the POS involved developing a display for presenting trekking shoes in the form of a mountain landscape, complete with a device for attaching a shoe to a transparent holder.

SPORTS EQUIPMENT - AN EXAMPLE OF SUCCESSFUL PRODUCT PRESENTATION AT THE POS MODULAR PRESENTATION OF TREKKING SHOES

To attract more attention from customers, a modular shop display concept was developed in collaboration with Merrell from Switzerland. This display can be flexibly decorated and equipped with real shoe models. An abstract mountain landscape with printed graphics was designed and produced in Kling's in-house production facility using the thermoforming process.

In our production facilities, we can mould a wide variety of plastic materials into the desired shapes. Customised production is possible at Kling, even for small batches. Square wooden cubes were also designed to complement this modular decoration, serving as eye-catchers at the point of sale.

PRODUCT DESIGN AT TABLO DESIGN MODERN DESIGN DEVELOPMENT

In good hands from design to series production

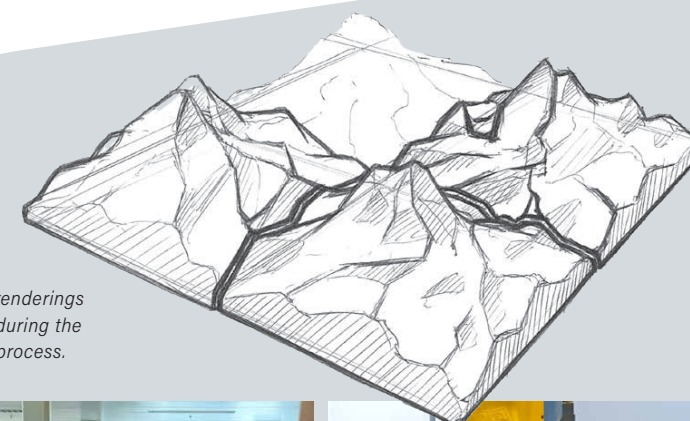

The individual components of the POS display, in the form of a stylised mountain landscape, were uniquely designed and produced at Kling.

These components were developed in collaboration with the client, refined through several development steps and test applications, and given their final look for the promotional trekking shoe presentation.

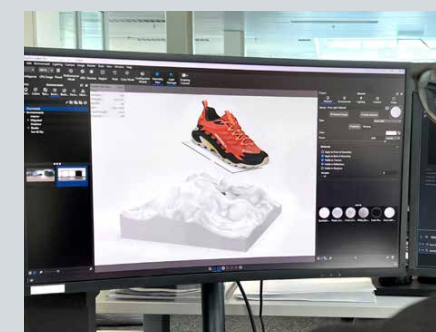

The design concept and technical development were realised by the in-house design agency, TABLO Design. During the development process, feasibility, realisation, and logistics were considered alongside design and ergonomics.

In production, the 3D display was moulded into the desired shape and manufactured in series. The thermoforming process can also be used to produce customised small series upon request.

The finished display creates a high-quality and eye-catching product presentation, allowing the interested end client to immediately recognise the unique atmosphere of the trekking products.

CAD and 3D renderings
were utilised during the
development process.

CLIENT PROJECT AOYAMA

DISPLAY FOR WATER SPORTS EYEWEAR

This acrylic glass display for the F2 brand was developed specifically for the client. It provides the brand manufacturer with a crucial opportunity for differentiation at the POS. The special feature of this display is the clarity of the back panel and a transparent, removable water container on the base plate to demonstrate the floatability of the sample glasses. The individual components were laser-cut and precisely assembled. Production, including delivery, was carried out in-house.

CLIENT PROJECT STARKEY

PRESENTATION DISPLAY FOR HEARING AIDS

The hearing aid manufacturer STARKEY has been relying on our quality products for years. Recently, a round free-standing display was produced for the market launch of the new NXG hearing aid series. All hearing aids are presented on a round disc, making them clearly visible and easily removable. The display is made of different coloured acrylic glass with a stand, providing an ideal, compact form of attractive product presentation.

CLIENT PROJECT JANSSEN COSMETICS

PRESENTATION DISPLAY FOR COSMETIC AMPOULE SERIES

The concept of the stepped arrangement for better visibility of the six product variants is the key feature of this acrylic glass display. Another advantage is the sustainable, reusable design in a neutral white colour. The display has a very compact shape to save space in stores. The removable, transparent back panel allows for the exchange of changing advertising motifs.

The entire structure, with its staircase-like arrangement, is stable, and the material is precisely laser-cut, moulded, and accurately glued. The displays are delivered in shock-resistant, compact packaging and are pre-assembled with essential shipping labels. This enables just-in-time delivery without the need for repackaging. A successful example of attractive design and intelligent logistics.

The Heritage box is an exclusive presentation box, produced in small quantities for trade fair presentations.

CLIENT PROJECT PORSCHE DESIGN

HERITAGE BOX FOR 50 YEARS OF PORSCHE DESIGN WATCHES

PORSCHE DESIGN has valued the efficient collaboration with KLING for many years. A highlight of this partnership was the production of this high-quality collector's box for luxury watches, created to mark the 50th anniversary of Porsche Design. This collector's box features a matte black lacquered solid wood construction with a precisely cut foam insert and removable fabric-covered watch holders. Each watch model is accompanied by a separate, individually printed label plate. Two printed label plates, a cushioned cover, lining with imitation suede, and printed design complete the overall look of the interior. High-quality, flat snap fasteners and a high-gloss print on the lid give the presentation box an extremely elegant, sleek appearance.

Kling's well-equipped production facilities enable a wide range of production options for packaging high-quality luxury products in an aesthetically pleasing and brand-appropriate manner. As specialists, we develop and produce luxurious packaging for our clients from high-quality materials, precisely tailored to each product.

Another highlight is this PORSCHE DESIGN consultant box, which supports the configuration of an individual watch in the Porsche Centres.

The finished collector's box in production.

THE COVER MATERIAL WITH A "REAL" WOOD LOOK NEW SURFACES FOR YOUR PRODUCT PRESENTATION

With the new WOOD DESIGN surface material, we offer you a "real" alternative to natural and often expensive wooden surfaces. The presentation trays in the Vario Norm, Vario Lux, and Basic Plus series can be covered with this material. The exterior cover makes the decisive difference with an extensive selection of surface designs that always offer a consistent look, even in larger quantities—without sacrificing elegance. As a result, the presentation trays are lighter, cheaper to manufacture, and can be delivered more quickly.

The new WOOD DESIGN surface material can be laminated onto suitable displays in a variety of wood-effect designs. We would be happy to show you a selection of possible applications.

VARIABLE DESIGN CUSTOMISED SMALL DISPLAYS

These tried-and-tested small displays with removable card inserts are versatile and ideal for jewellery presentation. They can be produced in a single colour or in a bi-colour look. At the back, these displays are equipped with either a fold-out stand or a fixed acrylic base. Depending on the format and application, the small displays can be flexibly positioned vertically or horizontally, or even placed in front of an existing display back panel. Please feel free to contact us.

The small displays can also be showcased with a picture back panel.

HIGH-QUALITY PRODUCT LABELLING

ENHANCE THE IMAGE OF YOUR QUALITY PRODUCTS

The product portfolio of BOSSERT GmbH, a Kling Group company, offers a wide variety of labels for product labelling and branding. The range includes decorative labels, hang tags, plastic labels, and high-quality injection-moulded labels, as well as adhesive labels on rolls and custom-made decorative labels. Bossert also provides various solutions for security products, such as innovative RFID labels. Numerous other products to support and enhance your brand image, along with our

range of thermal transfer label printers and printer accessories, complete our comprehensive offering. Interested? Please request our current mailing with samples. We look forward to receiving your enquiry. Quality is Bossert's top priority, evident in every detail of our high-quality labels – see for yourself!

HANGING LABELS

To label its award-winning range of spirits, the KUENZ natural distillery uses these folded carton hang tags with colour printing and perforation, as well as a colour-graded fixing rubber for bottles or gift boxes. Available for order quantities starting from 3,000.

METAL LABELS

Whether intricate motifs such as clock dials or larger lettering, the self-adhesive gold/silver-coloured metal stickers and metal labels from Bossert give every motif a high-quality and appealing look. The metal labels are customised and produced in small quantities.

LABELS AS BOOKLETS

Printed self-adhesive booklets for resealing can be used in various ways for sales and industry. These can be stuck directly onto products or other stock labels.

THREAD LABELS

Thread labels are equipped with an exceptionally thin thread for attachment and are ideal for labelling fine, high-quality items such as jewellery and watches. We manufacture thread labels in many different sizes and designs – Bossert offers thread labels made of cardboard, paper, or hard plastic.

INJECTION-MOULDED LABELS

Special product labelling with injection-moulded labels: We manufacture your individual injection-moulded labels according to your specifications – you decide on the shape, colour, and different attachment and processing options. Bossert offers a wide range of design options for injection-moulded labels.

ROLL LABELS FOR SELF-PRINTING

For the Micra II thermal transfer label printer, you can receive the matching label rolls in various colours and shapes – with external or internal rewinding. The thermal transfer label printer executes your print jobs reliably and in high resolution. The print image is abrasion-resistant and weatherproof on a wide range of materials.

DISCOVER NEW IMPULSES AT VICENZAORO

VISIT US AT OUR EXHIBITION BOOTH

VicenzaOro 2024 will take place once again in Vicenza, Italy, from 6 to 10 September 2024. As Europe's leading jewellery, watch, and gemstone fair, it offers an excellent overview of popular designs, current trends, and product innovations.

We at Kling GmbH will also be present as exhibitors (this time at a new location due to construction measures by Messe IEG) and look forward to an interesting and productive exchange with you!

Learn about our innovative product presentation possibilities with show-cases, modern display variations, high-quality presentation trays and boxes, and much more.

Look forward to inspiring ideas for your business.

NEW 3D STUDY

PREMIERE OF NEW PRESENTATION BUSTS

Prototyping new bust models for production using the 3D printing process. Spectacular in both design and production, the manufacturing industry is undergoing significant change. While prototypes used to be built, sanded, cut, or punched through a long and costly process, 3D printing now makes this process more efficient: with new 3D printing technology, the material is printed or fused from a single piece.

This new type of bust study consists of a highly filigree frame construction with a three-dimensional cavity structure that could not be realised using other manufacturing methods. The result is an incomparable appearance for jewellery presentation, with integrated interior lighting.

This project is currently under development and will be available to order soon. If you are interested, please subscribe to our newsletter, and you will be the first to receive information about availability.
